RESPONSE

In response to the 35 U.S.C. 112 first paragraph rejection, applicants have amended the first claim. Applicants do note, however, that C1 bacteriophage can and do code for a lytic enzyme having the ability to lyse for Strep. Groups A, C, and E, and thus inclusion of these groups in a claim would be allowed under inherency.

Applicants are filing, along with this response the terminal disclaimer for the patents and patent applications.

The application is now in condition for allowance. Please call the undersigned at (301) 603-9071 if you have any questions or comments. Thank you.

Very truly yours,
